Detailed Action

1. This action is responsive to communications: Application filed on 10/29/03.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by

Koyayashi et al., US# 2005/0050038 A1.

As per claim 1, Kobayashi et al. teaches “a reception server which is connected to a network including the Internet to receive an access request from an external system connected to the network” (see paragraph [0017]) “access data storing means for storing searchably in association with search condition information including one or a plurality of words and association information for semantically associating the words with one another, access information expressing a location of information to be searched which is specified by the search condition information” (see paragraph [0022]-[0023]) “registration processing means, connected to said reception server, for performing registration of the access information into a database under a predetermined condition, based on a registration request received via the network; and searching

means, connected to said reception server, for searching the search condition information in the database under a predetermined condition, based on a search request received via the network and outputting a search result which includes the access information corresponding to the search condition information" (see paragraph [0022] and [0025]-[0026]).

As per claim 2, Kobayashi et al. teaches "a link address to a message board or a home page" (see paragraph [0006] and [0012]).

As per claim 3, Kobayashi et al. teaches "wherein the association information comprises a short association word which indicates relation between the words, including apposition, possessive, belongingness, attribution, purpose or relation" (see paragraph [0006] and [0021]-[0022]).

As per claim 4, Kobayashi et al. teaches "wherein the association word comprises: "of", "for" . . ." (see paragraph [0021]).

As per claims 5 and 9, Kobayashi et al. teaches "wherein the association word corresponds to a predetermined association word in another language" (see paragraph [0017] and [0022], wherein Kobayashi's teachings of multiple operating systems includes various language as implied in applicant's claim language.

As per claim 6, Kobayashi et al. teaches "wherein said searching means carries out search by exact matching of search condition information specified by the search request and the search condition information in the database" (see paragraph [0021] and [0023]).

As per claim 7, Kobayashi et al. teaches "information storing means which is

accessed based on the access information and said information string means comprises information registering means for registering information to be provided, corresponding to the search condition information" (see paragraph [0023] and [0024]).

As per claim 8, Kobayashi et al. teaches "wherein said information storing means comprises a message board" (see paragraph [0006] and [0011], wherein Kobayashi's website interactivities is equivalent to applicant's message board).

As per claim 10, Kobayashi et al. teaches "wherein said searching means carries out search by exact matching of search condition information specified by the search request and the search condition information in the database" (see paragraph [0021] and [0024]).

As per claim 11-17, these claims are rejected on grounds corresponding to the arguments given above for rejected claims 1-10 and are similarly rejected.
